MOKSHAGNA MADDASANI

+91 9014527847 | mokshareddy3112@gmail.com | linkedin.com/in/mokshagna1231 | github.com/mokshaaa31

Summary

Computer Science Engineering graduate (2026) with hands-on experience in software development and testing. Software Development Engineer in Test (SDET) intern at RealPage, automating regression and navigational tests with Java, Selenium, and TestNG, with prior experience building and testing web applications at Avison Technologies. Skilled in debugging, test automation, and Git-based version control, with AI/ML project experience in multimodal emotion recognition.

Skills

Programming Languages: Java, TypeScript, JavaScript, SQL
Web Technologies: HTML, CSS, Tailwind CSS
Testing & QA: Selenium, TestNG, Software Testing, Debugging
Databases: SQL, DBMS, PostgreSQL
Version Control: Git, GitHub
Tools & IDEs: VS Code, IntelliJ IDEA, Eclipse, Azure DevOps
AI Tools: Claude, AI-assisted development & automation

Certifications

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
DevOps on AWS Specialization – Coursera
Explore Machine Learning using Python – Infosys Springboard

Work Experience

Software Development Testing Intern (SDET) | RealPage, Hyderabad ***Apr 2026 - Present***

- Automate regression, maintenance, and navigational test cases for the Asset and Investment Management project using Java, Selenium, and TestNG.
- Manage and execute test cases in Eclipse, tracking and organizing them in Azure DevOps.
- Use Git for version control to pull and push code changes.
- Leverage AI coding agents to accelerate automated test case development.

Software Development & Testing Intern | Avison Technologies, Remote ***Sep 2025 - Feb 2026***

- Contributed to the development and testing of three web applications (Grab the Deals, eHundi, and PanditDesk) as part of a collaborative team.
- Took on a Team Lead role from the fourth month, coordinating team members, assigning tasks, and guiding implementation approaches while continuing to contribute individually.
- Identified and documented bugs as Jira stories, collaborated with the team to resolve them, and validated fixes before deployment.
- Managed code changes through Git/GitHub across the full development lifecycle: implementation, debugging, testing, and deployment-ready delivery.

Software Development Intern | High Go Info Solutions, Hyderabad ***May 2025 - Jul 2025***

- Built an Employee Salary Prediction application that estimates salary from job role, experience, location, age, and other factors, supporting both CSV-based and manual input.
- Developed and deployed an interactive application using Streamlit, with Git/GitHub for version control.
- Enabled HR teams to estimate salary ranges and support data-driven compensation decisions, improving the efficiency of preliminary salary analysis.

Projects

Multimodal Emotion Recognition using Cross-Attention Transformers

- Led a team of 4, delegating responsibilities based on team strengths and tracking progress to meet milestones on time.
- Built a multimodal emotion classification system combining facial expressions and audio signals using PyTorch, TorchAudio, and OpenCV.
- Implemented a CNN-based audio encoder and a ViT-based video encoder, fused through a custom cross-attention transformer module and classified with a softmax classifier.
- Evaluated performance using accuracy, classification reports, and confusion matrices (Scikit-learn, Matplotlib).

Education

B.Tech - Computer Science Engineering ***Sep 2022 - May 2026***

GITAM Deemed to be University, Hyderabad | CGPA: 8.45 | Recipient of 25% academic scholarship each year
